The course aims to provide the students with basic knowledge of the principles of cognitive neuropsychology, while focusing on the scientific research and studies of cognitive deficits following brain injury.

The course will be based on lectures and reading of the course's bibliography, which can be found in the library. Copies of this book can be downloaded from the Laboratory of Cognitive and Electrophysiological Psychology's website (links)

http://cel.huji.ac.il/ URL

The following sites can be used to clarify new concepts:

http://www.medicalneuroscience.com/neuro_glossary.asp
http://brainconnection.positscience.com/gen/gloss.html
http://faculty.washington.edu/chudler/gloss.html

The assessment will be based on multiple-choice questions that will be held.

The material for the assessment will include the material covered in the lectures and all the reading material as listed below.
